1. INTRODUCTION

As the leading regional Payment Gateway Provider in South East Asian countries, iPay88 allows customers to carry out transactions on the internet fast and securely and also enables store owners to take their revenues back easily.

As mobile commerce has recently gained popularity all over the world especially in ASEAN, iPay88 catches up with this trend by allowing customers make payments via mobile, however, in mobile apps, it is still difficult.

As specialists in mobile shopping apps, SimiCart makes it easier for you to integrate iPay88 payment gateway in your shopping app with a plug-in called **iPay88**.

Outstanding Features:

- Supports Android and iOS
- Have the same features as iPay88 on your webstore.
- Friendly interface
- Easy to configure, maintain and use

This document will guide you through the installation and configuration process of **iPay88** plug-in.

2. HOW TO INSTALL

1. After purchasing plug-in, you will be directed to App management page. Go to **Build App** tab; download **iPay88** connector, which is a zip file.
2. It is required to enable cache in the administration panel of your site. Go to **System/Cache Management**. Choose all caches and take action “Enable” then submit.
3. Use FTP client (such as Filezilla, WinSCP, cuteFtp) to upload or copy all folders in the zip package to your Magento site root folder. This will not overwrite any existing files, just add new files to the folder structure.
4. After uploading is done, log in to your Magento administration panel to refresh cache. Go to **System/Cache Management**. Select all caches and take action “Refresh” then submit.
5. Navigate to **System/Configuration**; if you can see the extension tab, it is installed properly.
6. Now if you get Access denied error when clicking on the extension tab, you need to log out admin panel and log in again.
7. Open the App Management, rebuild your app with the **iPay88** plug-in and test your work.

3. HOW TO CONFIGURE

In order to configure this plug-in in your shopping app, you should follow these steps:

- Login to your Magento Backend
- Click **SimiCart** tab in the top menu
- Click **iPay88** in drop-down menu

- It leads to the **Payment Methods** settings. In **Simi-iPay88** section, you will see this page:

The screenshot shows the configuration page for the iPay88 payment method. The title is 'Simi - iPay88'. The 'Enabled' dropdown is set to 'No'. The 'Title' field is empty. The 'New Order Status' dropdown is set to '-- Please Select --'. The 'Payment from Applicable Countries' dropdown is set to 'All Allowed Countries'. The 'Payment from Specific Countries' field is a multi-select list containing: Afghanistan, Aland Islands, Albania, Algeria, American Samoa, Andorra, Angola, Anguilla, Antarctica, and Antigua and Barbuda. The 'Merchant Key', 'Merchant Code', and 'Sandbox Mode' (set to 'No') fields are also present.

- ✓ **Enabled:** Select **Yes** to show iPay88 in your app
 - ✓ **Title:** Enter the title of the payment method. It will be shown in your app.
 - ✓ **New Order Status:** You can select the status of new orders here
 - ✓ **Payment from Applicable Countries:** There are two options here:
 - All allowed countries – Accept payment from all countries
 - ✓ Specific countries – Select payment from specific countries only
 - ✓ **Payment from Specific Countries:** Select the countries you want to apply this payment
 - ✓ **Merchant Key:** This is provided by iPay88 when you sign up for an account
 - ✓ **Merchant Code:** This is provided by iPay88 when you sign up for an account
 - ✓ **Sandbox Mode:** If you want to test the payment method, choose **Yes** for Sandbox Mode. Payments will not be charged in this mode.
- Remember to click **Save Configuration** when you are done.

4. HOW TO USE IPAY88

Like iPay88 in web store, iPay88 plug-in allows your customers to make payments when they add to cart on your mobile app. They can make payments easily by following these steps:

- Add products to cart then tap on **Checkout** button

- Buyers will be directed to add their billing address

Copyright (c) 2015 www.simicart.com

- After that, they will be directed to a checkout page with the following information:
 - o **Billing and Shipping Addresses** – Review the billing address or select a new one
 - o **Payment:** Select iPay88
 - o **Shipment Details:** Select shipping method

- When all information is confirmed, tap **Place Now**.

- The loading screen looks like this:

- Customers can input their payment details and tap **Proceed** to complete payment

The screenshot shows the iPay88 mobile application interface. At the top, the status bar displays 'Viettel' and '9:03 AM'. The app header is orange with a back arrow and the text 'ipay88'. Below the header, there is a 'Payment Option' section with a lock icon and a dropdown menu set to 'Credit Card'. The 'Credit Card Details' section includes input fields for 'Name', 'Credit Card No.', 'CVC/CVV2', and 'Expiry Date' (with month and year dropdowns). It also features dropdown menus for 'Issuing Country' (set to 'Malaysia') and 'Issuing Bank' (set to 'Please Select'). Below these fields is a checkbox for authorization: I authorize Mobile88.com Sdn Bhd to debit the above net of my credit card. An 'Important Note' with a link icon is present. At the bottom of the form are 'Proceed' and 'Cancel' buttons. The bottom navigation bar contains icons for 'Home', 'Category', 'Search', 'Cart', and 'More'.

-----THE END-----
