II. INSTALL PWA CONNECTOR

***Please note that PWA only works on HTTPS sites.**

1) Download PWA Connector:

- Option 1: Download from GitHub

<https://github.com/Simicart/pwacommerce>

- Option 2: Register the Free PWA version from SimiCart website and go to My Free Products menu in your Account

Skype: simicart_support

2) Extract the downloaded package

1) Upload the extracted package to Magento root directory

Use an FTP client (such as FileZilla) to upload the extracted package to Magento root directory on your website server.

The location of the Magento root folder depends on where you originally installed Magento, and is also driven by your webhosting company. Common folder locations to check are:

- /
- /public_html
- /www
- /var/www/
- /home/YOURUSERNAME/www
- /home/YOURUSERNAME/public_html
- /srv/

You know you've found the right folder when you see the following subfolders:

- app
- downloader
- errors
- includes

2) Refresh cache

In your Magento backend, go to **System > Cache Management**. Click **Select All** and then **Actions > Refresh**, then click **Submit**.

Cache Storage Management

Flush Magento Cache | Flush Cache Storage

Cache Type	Description	Associated Tags	Status
<input checked="" type="checkbox"/> Configuration	System(config.xml, local.xml) and modules configuration files(config.xml).	CONFIG	ENABLED
<input checked="" type="checkbox"/> Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	ENABLED
<input checked="" type="checkbox"/> Blocks HTML output	Page blocks HTML.	BLOCK_HTML	ENABLED
<input checked="" type="checkbox"/> Translations	Translation files.	TRANSLATE	ENABLED
<input checked="" type="checkbox"/> Collections Data	Collection data files.	COLLECTION_DATA	ENABLED
<input checked="" type="checkbox"/> EAV types and attributes	Entity types declaration cache.	EAV	ENABLED
<input checked="" type="checkbox"/> Web Services Configuration	Web Services definition files (api.xml).	CONFIG_API	ENABLED
<input checked="" type="checkbox"/> Web Services Configuration	Web Services definition files (api2.xml).	CONFIG_API2	ENABLED

Additional Cache Management

Flush Catalog Images Cache | Pregenerated product images files.

Flush Swatch Images Cache | Pregenerated configurable swatches image files.

Flush JavaScript/CSS Cache | Themes JavaScript and CSS files combined to one file.

After cache refresh, PWA menu will appear:
