# 1. INTRODUCTION

SimiCart is a mobile commerce solution that helps you create a mobile App for your store in the easiest way. Whenever entering a transaction, the convenience in payment is always of high importance to the attending parties, and mobile commerce is not an exception. With SimiCart, you can use mobile payment gateways to allow customers to check out and pay for their orders quickly and securely from within the App. SimiCart is now integrated with ZooZ and PayPal Mobile Payment Gateways to bring you the most native checkout experience. This manual will guide you how to set up payment gateways for your App.

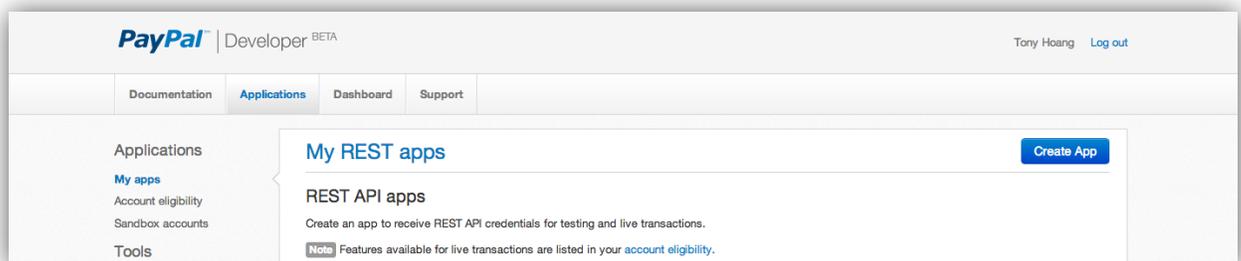

## 2. PAYPAL MOBILE PAYMENT GATEWAY

PayPal has specially designed a new payment gateway for mobile. PayPal Mobile supports credit and debit card payments. PayPal email, Client ID, Client Secret, API Username, API Password and Signature are required to integrate this payment gateway to your App. Please take the following steps:

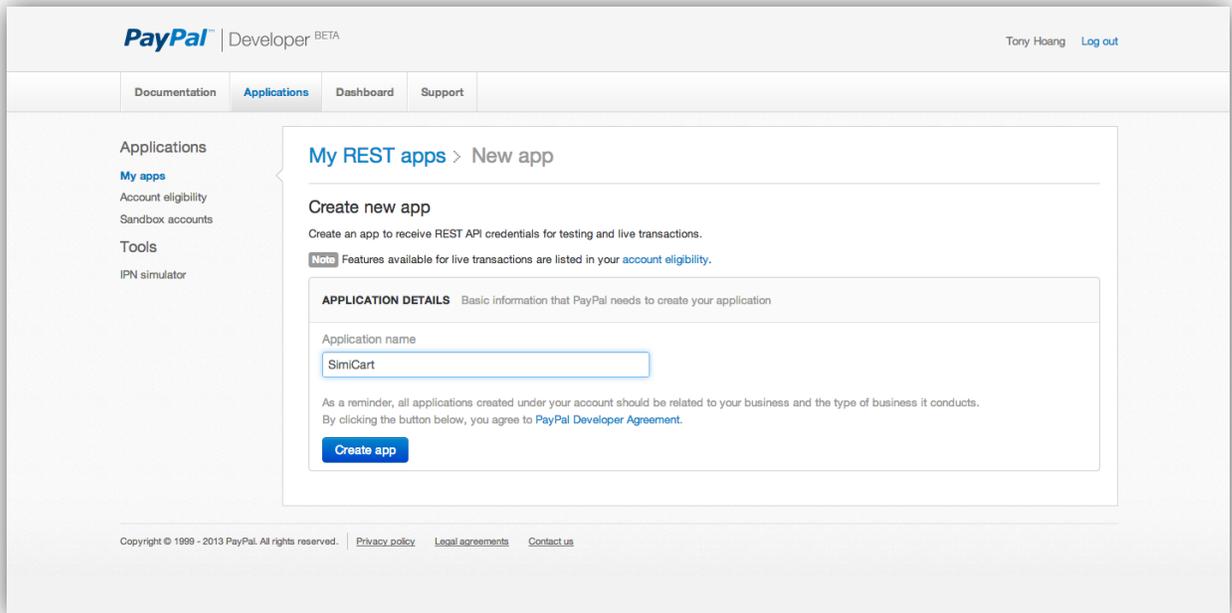

- Step 1: Go to [www.developer.paypal.com](http://www.developer.paypal.com) and log in to Developer website using your PayPal account by clicking on the **Login** button at the top right of the page.

- Step 2: Choose **Applications** Tab then click on **Create App** button.

- Step 3: On **Create new app** page, enter your App name then click on **Create App**.

- Step 4: After that, you will see the **REST API Credentials** for **Test mode** and **Live mode**.

**Test** means that all transaction information is sent to test servers at PayPal. No money trades hands in test transactions.

**Live** means that all transactions that you submit are sent to the financial institutions for processing and that real money is transferred.

Test credentials will be displayed first. If you want to use Live mode, you can click on **Show** link, and please pay attention to Account, Client ID and Secret fields.

### SimiCart

#### APP DETAILS

Application name : SimiCart

Application display name : SimiCart 

**App redirect URLs** [Edit](#)

Redirect URLs are required for Log In with PayPal features.

#### REST API CREDENTIALS

**Test credentials**

Your test credentials are enabled for all features in your application.

Test account : tony-facilitator@magestore.com

Endpoint :

Client ID :

Secret :

**Live credentials** [Show](#)

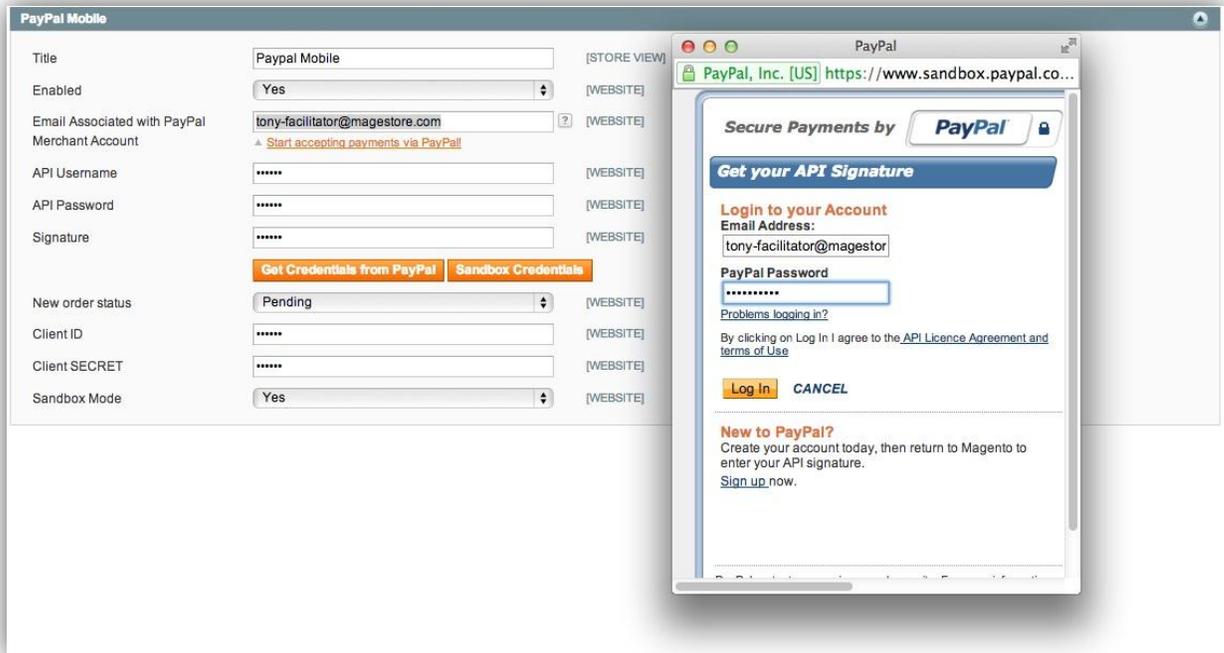

- Step 5: Go to your Magento admin panel, choose **System** → **Configuration** → **Payment Methods** → **PayPal Mobile** and enter the Email, Client ID and Client SECRET which you have created in step 4.

Payment Methods		Address.net	
		Zooz Payment	
<b>CATALOG</b> Catalog Inventory Google Sitemap RSS Feeds Email to a Friend		<b>PayPal Mobile</b> Title: Paypal Mobile [STORE VIEW] Enabled: Yes [WEBSITE] Email Associated with PayPal Merchant Account: tony-facilitator@magestore.com [WEBSITE] <a href="#">Start accepting payments via PayPal</a> API Username: [WEBSITE] API Password: [WEBSITE] Signature: [WEBSITE]	
<b>CUSTOMERS</b> Newsletter Customer Configuration Wishlist Promotions Persistent Shopping Cart		<input type="button" value="Get Credentials from PayPal"/> <input type="button" value="Sandbox Credentials"/> New order status: Pending [WEBSITE] Client ID: [WEBSITE] Client SECRET: [WEBSITE] Sandbox Mode: Yes [WEBSITE]	
<b>MAGESTORE EXTENSION</b> Auto Login SimiCart - Mobile Demotip			
<b>SALES</b> Sales Sales Emails PDF Print-outs Tax Checkout Shipping Settings Shipping Methods Google API			
<b>Payment Methods</b>			

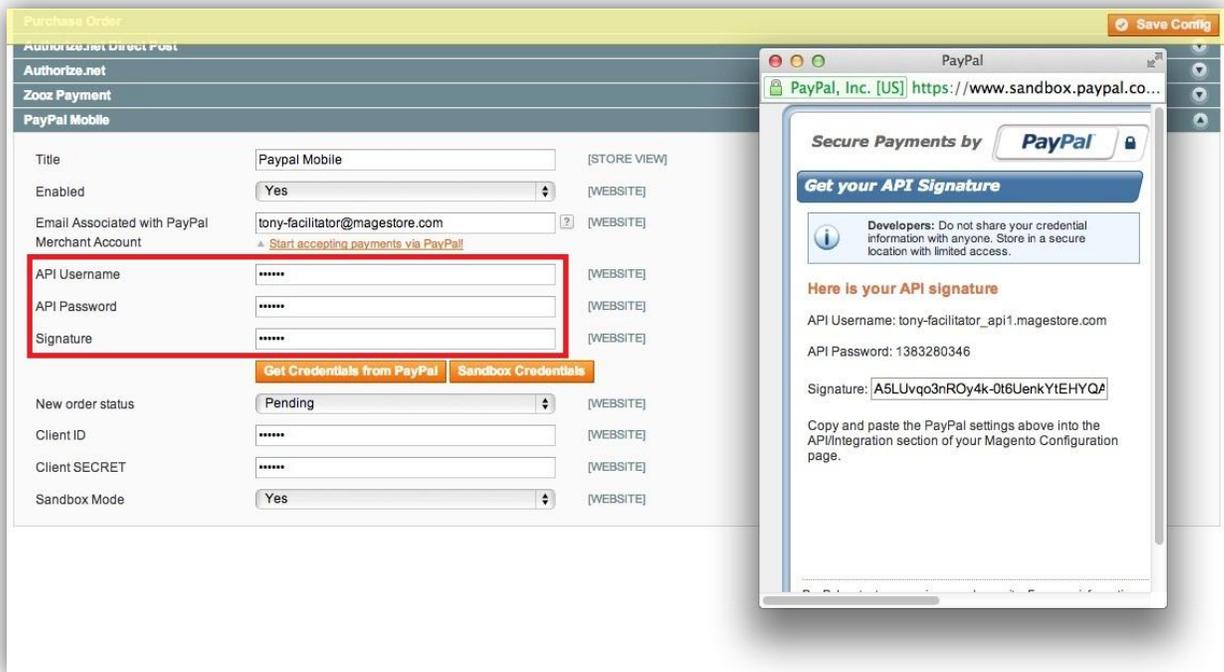

➤ Step 6: Click on button **Get Credentials from PayPal** for Live mode or **Sandbox Credentials** for Test mode. There will be a popup shown for you to log in to your account associated with the mode.

If you are in Test mode, please log in by your test account (sandbox account).

If you are in Live mode, please log in by your live account.

- Step 7: After logging in, you will get your API signature, including API Username, API Password and Signature. Please copy and paste that information into the API Integration section of your Magento Configuration page.

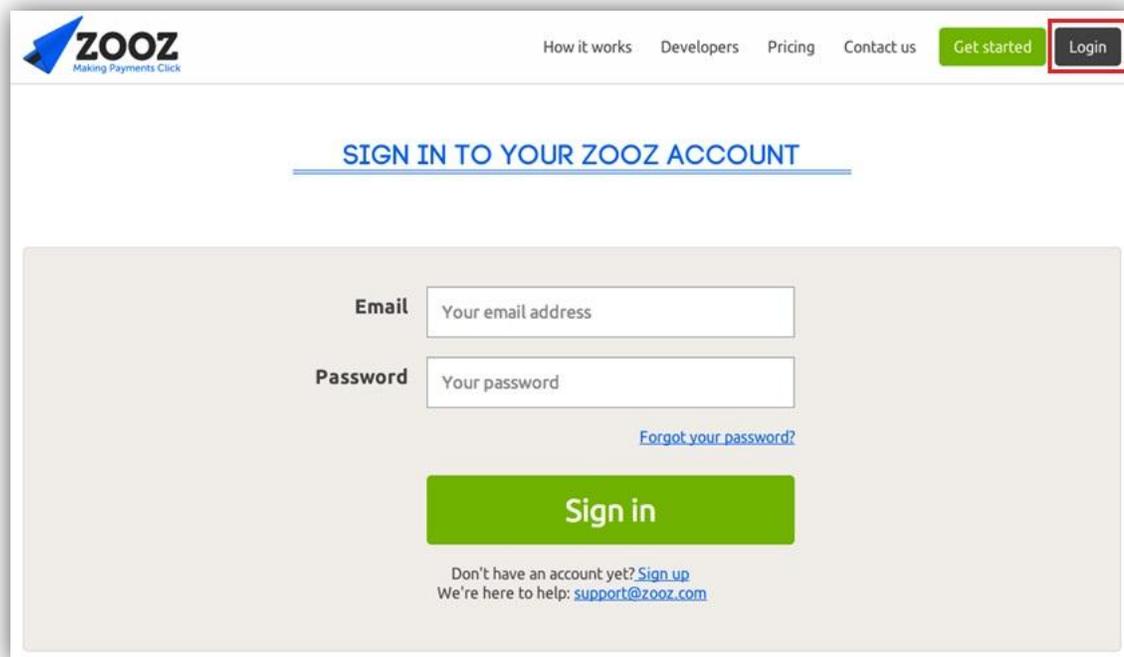

➤ Step 8: Click on **Save Config** button at the top right of the page.

The process of integrating with PayPal Mobile Payment Gateway is complete. Your mobile App can now execute transactions via this payment gateway.

### 3. ZOOZ PAYMENT GATEWAY

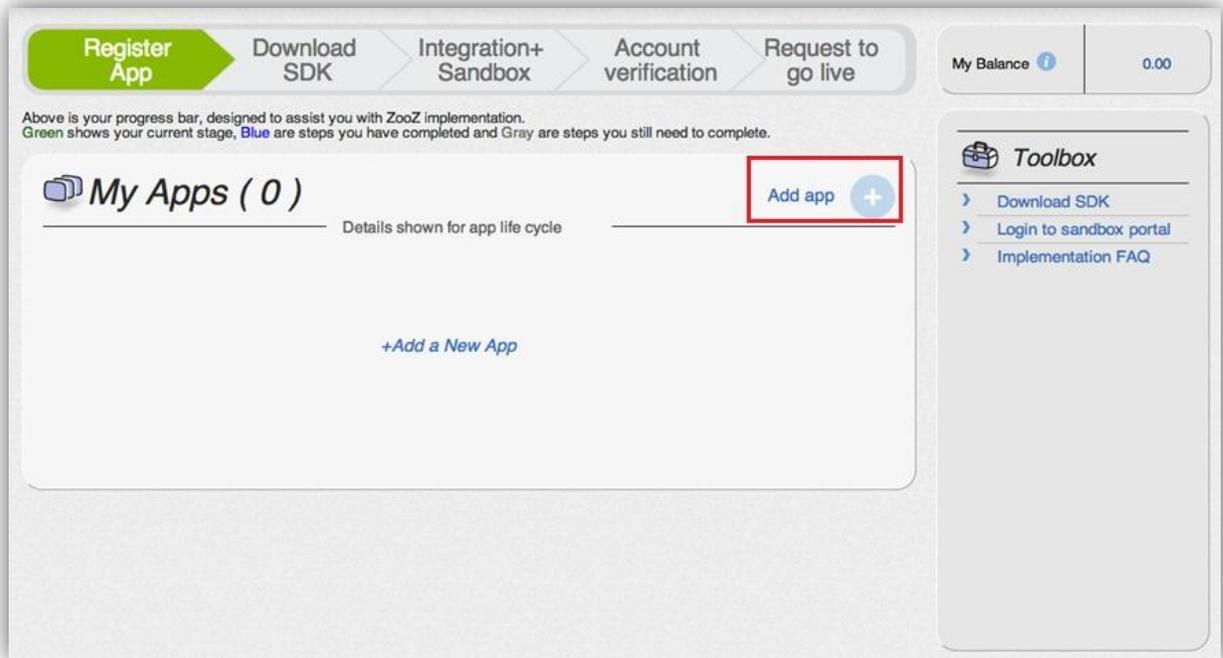

ZooZ Payment Gateway also provides credit/debit card payment methods with support for other payment gateways like Authorize.net, SAGEpay, Google Wallet and Amazon Payment. If you haven't had a ZooZ account, you can visit [www.zooz.com](http://www.zooz.com) and sign up for an account. Then, follow the following steps to integrate ZooZ Payment method with your mobile App.

- Step 1: Log in to your ZooZ account by clicking on the **Login** button in the top right hand corner of the page.

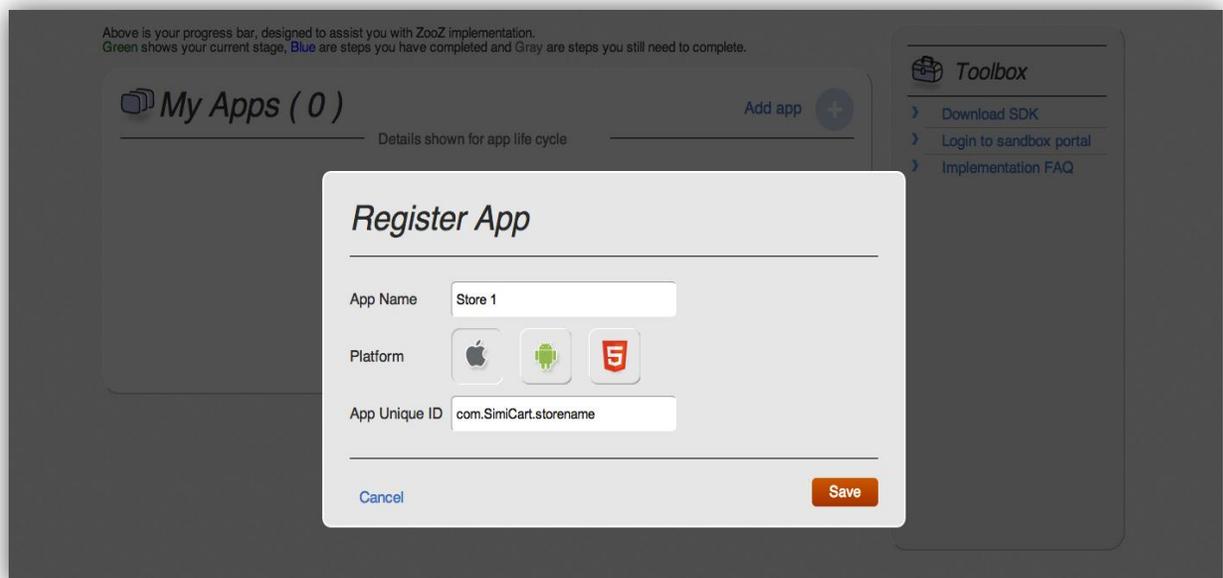

The screenshot shows the ZooZ login page. At the top left is the ZooZ logo with the tagline "Making Payments Click". The top right navigation bar contains links for "How it works", "Developers", "Pricing", "Contact us", "Get started", and "Login". The "Login" button is highlighted with a red border. The main heading is "SIGN IN TO YOUR ZOOZ ACCOUNT". Below this is a login form with two input fields: "Email" with the placeholder "Your email address" and "Password" with the placeholder "Your password". A link "Forgot your password?" is located below the password field. A large green "Sign in" button is centered below the form. At the bottom of the form, it says "Don't have an account yet? [Sign up](#)" and "We're here to help: [support@zooz.com](mailto:support@zooz.com)".

- Step 2: Click on **Add app** button.

- Step 3: Enter your App name, mobile platform on which your App is built and your App Unique ID. Please note that your App Unique ID must start with **com.SimiCart**. For example: com.SimiCart.storename. If your store name is ABC, your App Unique ID should be com.SimiCart.ABC.

- Step 4: After that, please enter the details for **Merchandise Description**, **Promotional text**, **Link to app** fields and set up the values for **Max Transaction Amount** and **Volume Monthly Amount**. For **Link to App** field, you can enter your website address if you have not had an iTunes download link yet.

Above is your progress bar, designed to assist you with your implementation. Green shows you the stage you are at, Blue is a stage you completed and Gray is a stage you still need to complete.

Full name

[Cancel](#) [Save & Continue](#)

- Step 9: After that, the **Request Approval To Go Live** page will be displayed. Please click on **Submit** button.

- Step 10: Your App has now been submitted to ZooZ for approval. It will be reviewed and accepted, then the status will be changed to **Approved**.

Please note that once your App is approved by ZooZ, you will not be allowed to change App Unique ID.

## 4. AUTHORIZE.NET PAYMENT GATEWAY

Authorize.net is a payment gateway that gives you the ability to accept credit card and electronic check payments quickly and inexpensively. SimiCart is integrated with Authorize.net and you can set up this payment gateway in your Magento backend for both of your e-commerce store and mobile app. Once your web-store enables Authorize.net payment method, your customers are also allowed to pay via this payment gateway when purchasing on your mobile app. To set up Authorize.net payment method, please take the following steps:

- Step 1: Create an Authorize.net merchant account

The first step is to create an Authorize.net merchant account. Please go to [www.authorize.net](http://www.authorize.net) and sign up for an merchant account.

As you go through the process, take note of the information about API Login ID and Transaction Key. You will need that information to complete the configuration in your Magento backend.

For more detail about opening an Authorize.net merchant account, you can visit their website at [www.authorize.net](http://www.authorize.net).

- Step 2: Log in to your **Magento backend**, go to **System > Configuration**. On the left Navigation, go to **Sales > Payment Methods**.
- Step 3: Click to expand the **Authorize.net** section.

**Authorize.net**
