## 1. INTRODUCTION

European Checkout plugin is exclusively designed for EU merchants or any merchants who want to establish their business in EU. Displayed on a layout complied with EU law, this SimiCart's plugin allows your customers to complete the checkout steps conveniently and directly on mobile. Do you want to satisfy your European customers and legislators as well? You definitely need European Checkout plugin.

### **Outstanding Features**

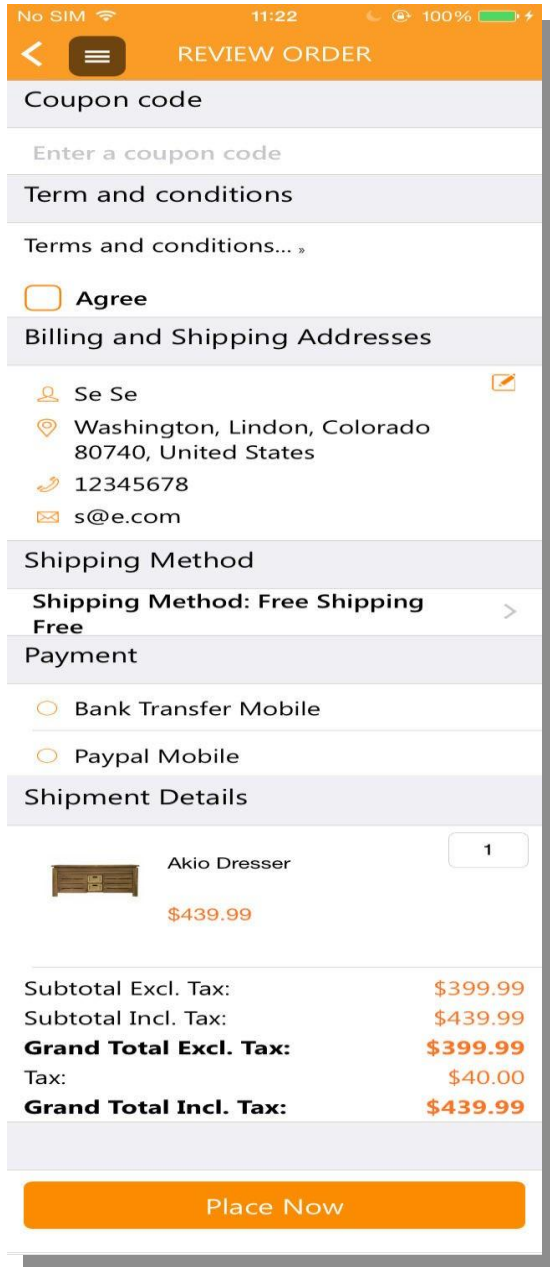

- Recommended for European merchants
- Simple to install and use
- User-friendly interface
- No need to configure anywhere
- Support both Android and iOS
- Compatible with Magento Community 1.4 – 1.9

## 2. HOW TO INSTALL

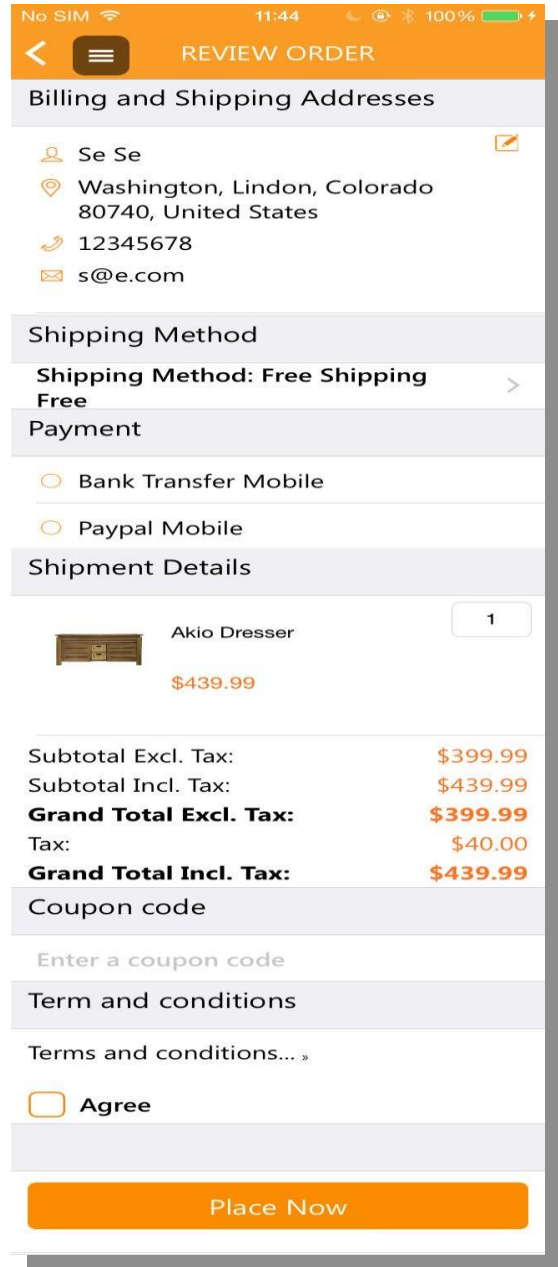

After purchasing **European Checkout** plugin, you will be directed to **App management** dashboard. Select **European Checkout** and click build/rebuild app again. There is no need to install connector or set up anything in your Magento backend.

### 3. HOW TO USE

European Checkout process differs from normal checkout process in Review Order page. This page layout complies with Europe's law:

European checkout layout

Normal checkout layout

After customers tap on “**Checkout**” on Shopping cart, filling in all information on “**Address Book**”, they will be directed to “**Review order**” page.

- (1) **Coupon code**: Customers enter coupon code to receive discount.
- (2) **Term and conditions**: Customers can tap on this to read term and conditions of buying. They need to tick “**Agree**” to finish checking out.
- (3) **Billing and shipping address**: Customers can check and edit this information.
- (4) **Shipping method**: Customers tap on this to choose their desired shipping method.
- (5) **Payment method**: Customers choose tick on one option to choose their desired payment method. When customers tap on each payment option, they will see some short descriptions of this payment method.
- (6) **Place now**: Once customers satisfy with their order information, they tap on “Place now” to complete checkout process.
