

SIMICART USER GUIDE SERIES

How to Configure SimiCart Extensions

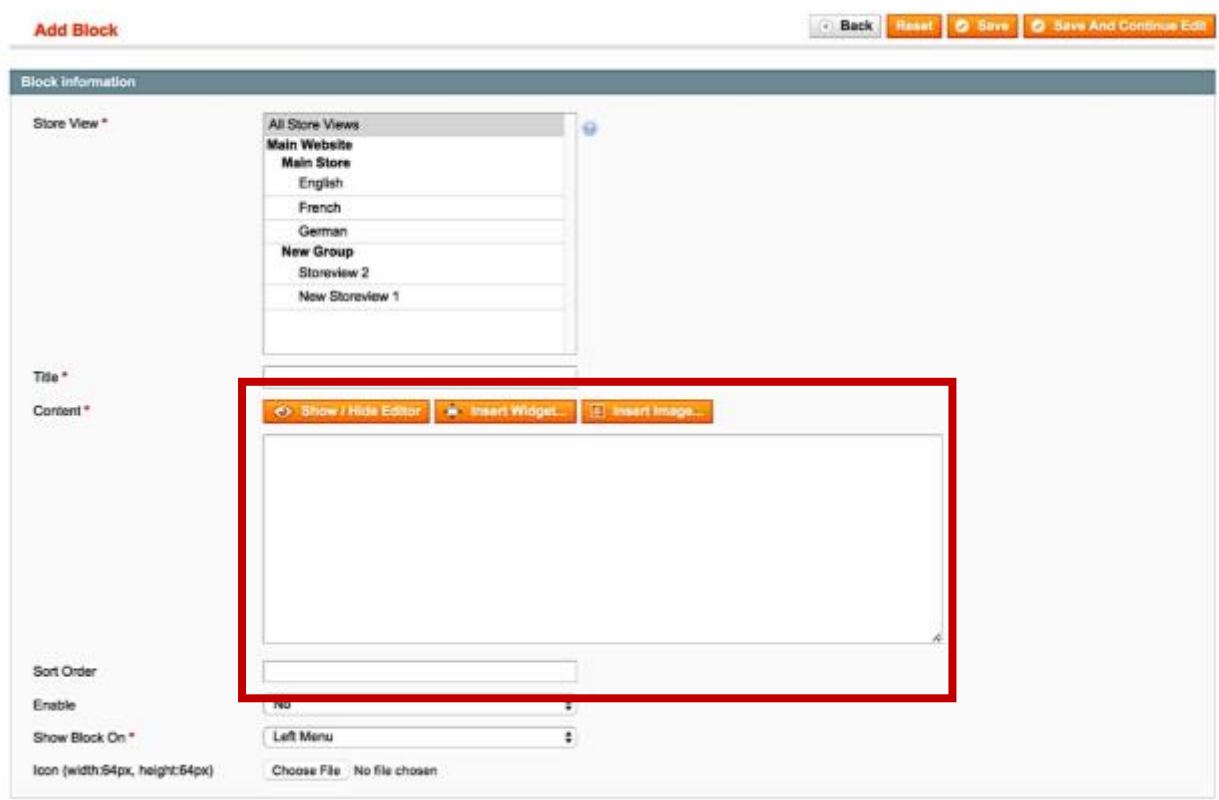

MANAGE CONTENT MANAGEMENT SYSTEM (CMS)

To edit the content of your CMS pages. Locating from **Simiconnector/Themes/CMS Pages**. Click **Add Static Block** to add a new CMS page.

You can choose to add a CMS page on one specific Store view or all of them by locating to **Store View** click on a store. For example **English, French or German**

Set a meaningful **Title** (Contact Us, Policy.. etc) before edit the content. You can either choose all of the three default Magento elements to add the content: **Editor** (Html editing tool), **Insert Widget** or **Insert Image**.

The screenshot shows the Magento CMS page editor interface. It includes the following elements:

- Title ***: A text input field.
- Content ***: A large text area for editing content. Above it are three buttons: "Show / Hide Editor", "Insert Widget...", and "Insert Image...".
- Sort Order**: A text input field.
- Enable**: A dropdown menu currently set to "No".
- Show Block On ***: A dropdown menu with two options: "Left Menu" (checked) and "Category In-app". This dropdown is highlighted with a red border.
- Icon (width:64px, height:64px)**: A label for the icon field, which is currently empty.

Choose **Yes/No** to **Enable** the CMS page. You also have the option to show the CMS page on the **Left Menu** (please attach an icon) or **Category** (please select). After all option is filled click **Save**.
