

# SIMICART USER GUIDE SERIES

## How to Configure SimiCart Extensions

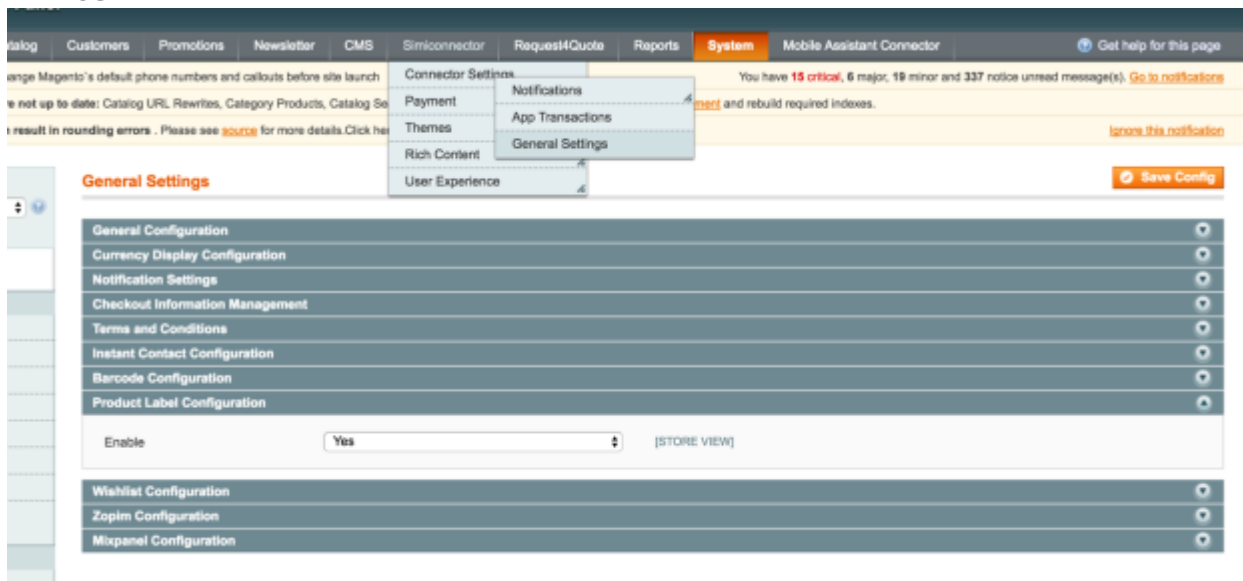

### CONFIGURE PRODUCT LABEL

---

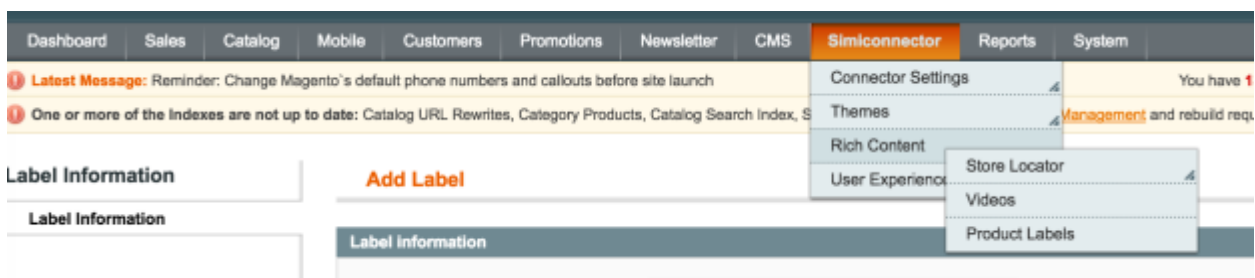

## HOW TO CONFIGURE AND MAKE IT WORK

1. Login to your Magento Backend. locate to **Simiconnector/ Connector Settings/ General Settings/ Product Label Configuration/**. Make sure the **Enable** field is **Yes**

2. To configure Product label, locate to **Simiconnector/ Rich Contents/ Product Labels**

3. On this new page, you can see your list of product labels and you can add new product labels by clicking on to **(+) Add New**.
  - **Status:** Choose if you want the label to be Enabled (shown to customers) or Disabled (not shown to customers)
  - **Store View:** Choose the store that you would like the label to appear

- **Label Name:** Choose the name of your label
- **Description:** For admin to set a description of the product label. Now shown to customers on the app.
- **Image:** You can select an image to appear behind the label text
- **Priority:** Select a priority level. The higher the value, the higher the priority of this label.
- **Text:** Write any text to appear on the product label (-10%, Sale, etc v.v)

The image shows a screenshot of a web application interface for adding a product label. The page title is 'Add Label'. The form includes the following fields:

- Status: Enabled
- Store View: English
- Label Name: Sale Campaign
- Description: (empty text area)
- Image (width:340px, height:340px): Choose File: corner-ribbon\_product-tag.jpg
- Position: Top-left
- Priority: 1 (Note: - The Higher the value, the higher the priority.)
- Text: -10%
- Product ID: 16

At the bottom, there is a pagination control showing 'Page 1 of 4 pages | View 20 per page | Total 79 records found' and a table with columns: ID, Product Name, Type, and SKU.

**\*Remember to save all changes by clicking on save.**
