# 1. INTRODUCTION

Tired of entering the same address again and again when making payment? Your customers feel the same. Why don't you let them use their current location to automatically fill it in checkout form? **Address Autofill** plugin is what you need.

Surely, it will help increase conversion rate on mobile.

**List of Features:**

- ✓ Easy to install and use

- ✓ Touch to get address

- ✓ No need to configure anywhere

- ✓ Support Android and iOS

- ✓ Connect directly with Location Settings in customers' devices

- ✓ Fast and secure for mobile devices

This document will guide you through the installation and usage process of

**Address Autofill** plugin.

## 2. HOW TO INSTALL

After purchasing this plugin, you will be directed to **App management** dashboard in SimiCart website. Just select this plugin and click rebuild app again. There's no need to install connector or set up anything on your Magento backend.

# 3. HOW TO USE ADDRESS AUTOFILL

This plug-in is different from others since it is only used for your customers and you don't need to configure anything.

1. **Settings**

    When customers choose **Setting** on the menu bar, they will be directed to **Location setting** on their devices. Customers choose **Always** so the app could detect their current location.
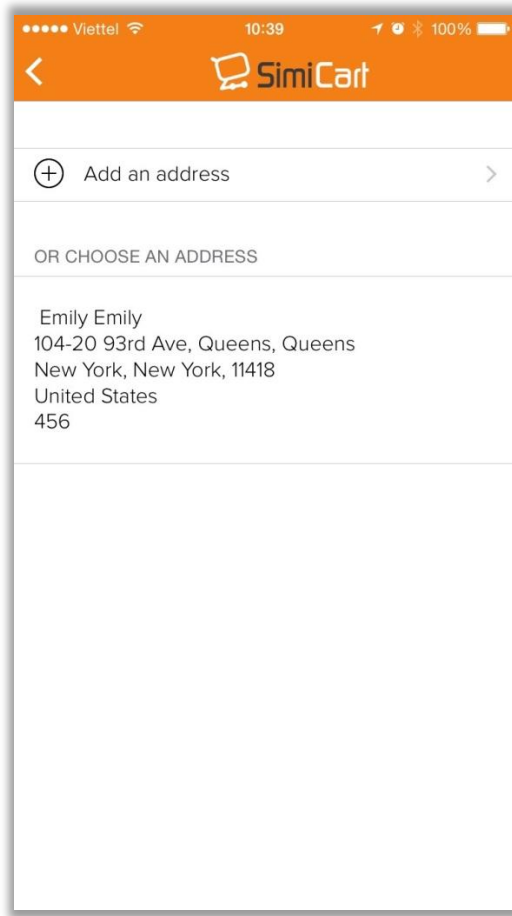

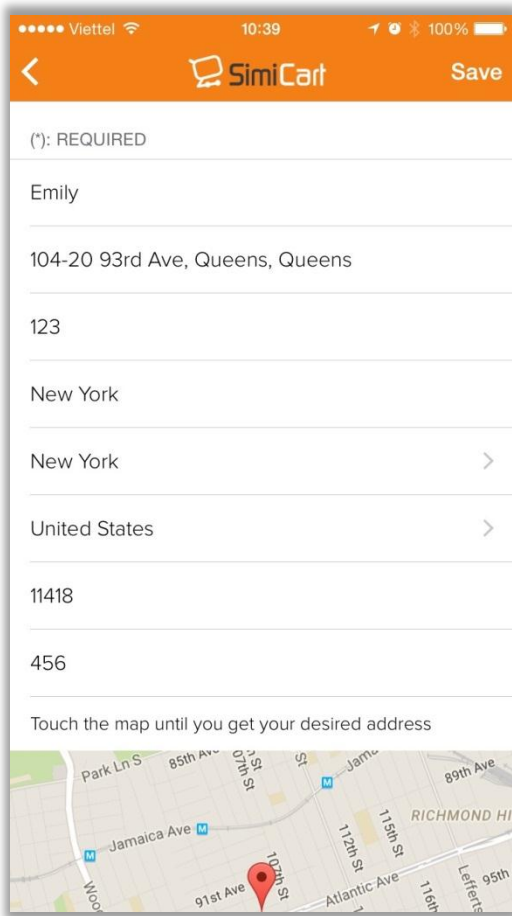

## 2. Checkout

When customers tap on **Checkout**, they will see a screen as below:

As customers scroll down, they will see Google map to choose their address.

- Customers can choose their current location by tapping on the button in the right corner. This location will be automatically filled in the billing address field.

- Or you can choose other location for your billing address. You just need to touch the map until you get your desired address. It will be automatically filled in form too.
